Copy of letter from Hempel:

## **Hempel's Marine Tank Linings compatibility with Masava Tank Cleaner Solid**

To whom it may concern

As per your request and after proper evaluation, we hereby confirm the compatibility between Masava Tank Cleaner Solid and Hempel Marine tank linings Hempadur 15500, Hempadur 15600 and Hempadur 15460.

This compatibility is subjected to the assumption that the cleaner is used strictly in accordance with the Use Instructions (e.g. maximum concentration, maximum temperature, maximum recirculation time, etc.) presented in the Product Information Sheet of Masava Kemi.

Any deviations in the use of the cleaning product from the Use Instructions stated in the Product Data Sheet will require a revision of the above stated compatibility between Masava Tank Cleaner and Hempel Marine tank linings.

The required solution in water of Masava Tank Cleaner shall be prepared prior to expose the cleaning solution to Hempel's coating. In addition, the cleaning solution shall never be left in the tanks for prolonged periods of time.

The tanks shall be thoroughly clean from the residual cleaning solution and properly ventilated prior to load the subsequent cargo, especially if next cargo requires a dry tank.
